It's a challenge to keep up with the latest technologies. But students and businesses alike depend on your ability to train the next generation IT workforce. The Microsoft IT Academy Program empowers your school with faculty training, early access to the latest technologies like .NET and XP, and the credibility of the Microsoft brand to help market your IT programs.

And, now through April 30th, IT Academies can buy 20 Optiplex GX240s equipped with Windows XP and a 17" monitor for just \$999 each — powered by Pentium 4! Wireless notebooks, switches and servers are also available in bulk discounts. It's only one of the many benefits that make your Microsoft IT Academy membership so valuable.

Become a Microsoft IT Academy today and start taking advantage of members-only offers during Dell's April IT Academy month.
