

Does
Heartburn

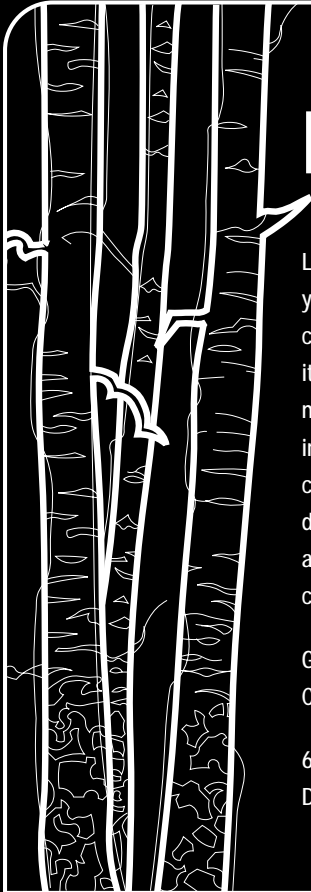

get you all fired up?

Every day, millions of adults take antacids to extinguish that fiery sensation behind the breastbone. If you experience heartburn, you may qualify for a clinical research study investigating new treatments for your condition. All study-related care is delivered by professionals at no charge, and you will receive financial compensation for your participation.

Getting involved can make a difference. Call today to find out if you qualify.

Is
Dermatitis
rough on you?

Like the bark of a tree, your skin protects you from the elements. But dermatitis can cause it to become cracked and itchy. If you experience dermatitis, you may qualify for a clinical research study investigating new treatments for your condition. All study-related care is delivered by professionals at no charge, and you will receive financial compensation for your participation.

Getting involved can make a difference. Call today to find out if you qualify.

Is
Genital Herpes

as tiresome as old baggage?

There are ways to cope with the itchy sore blisters of genital herpes, but it's baggage you'll carry around for life. If you experience recurring bouts of genital herpes, you may qualify for a clinical research study investigating new treatments for your condition. All study-related care is delivered by professionals at no charge, and you will receive financial compensation for your participation.

Getting involved can make a difference.
